[Agra, Uttar Pradesh, India]

PROFESSIONAL SUMMARY

Motivated BCA graduate and full-stack web developer skilled in building complete, production-ready web applications from concept to deployment. Experienced across the development lifecycle — database design, backend logic, API integration, authentication systems, and modern responsive front-end interfaces. Adaptable across business domains including e-commerce, business management tools, booking systems, content platforms, and custom websites. Currently expanding into front-end frameworks, UX design, and cloud computing through structured certifications. Strong design instinct, fast learner, and comfortable picking up new technologies and tools as project requirements demand.

CAPABILITIES — WHAT I CAN BUILD

Business Web Applications

End-to-end web systems for inventory, sales, billing, booking, CRM, and reporting — built with PHP and MySQL from database to deployment.

Inventory & Stock Management Systems

Full product catalogs, stock tracking, low-stock alerts, supplier and category management — built end-to-end with PHP and MySQL.

Sales & Billing Platforms

Invoice generation, sales history, customer records, and revenue dashboards with real-time totals. Auto-generated invoice numbers, walk-in customer support, multi-product transactions, and printable invoice output.

Custom UI/UX Design & Theming

Modern, distinctive visual interfaces — including dark themes, gradient and neon-accented designs, glassmorphism, and multimedia integration. Comfortable adapting to any brand style or design system.

Bug Fixes & Website Maintenance

Debugging PHP/MySQL issues, fixing CSS layout problems, and improving existing websites.

Authentication & Access Control

Secure login systems, session management, password hashing, forgot-password flows, and role-based access control (Admin / Staff).

Admin Dashboards & Data Visualization

Clean, modern admin panels with real-time stat cards, filterable data tables, revenue summaries, and alert systems.

Invoice & Sales Processing
Auto-generated invoice numbers, sales history, walk-in customer support, multi-product transactions, and printable invoice output.

Business Websites & Landing Pages
Responsive multi-page websites for shops, clinics, hotels, and service businesses — mobile-friendly, SEO-structured, and fast loading.

AI-Integrated Development Workflow
Proficient in leveraging ChatGPT, GPT-based tools, and Runway ML within the development process for prompt engineering, visual concept generation, and animation production.

Database Design & Optimisation
Relational schema design with foreign keys, normalisation, query optimisation, and phpMyAdmin administration for small-to-medium applications.

TECHNICAL SKILLS

Languages & Backend	**PHP (Core + OOP) • MySQL • JavaScript • HTML5 • CSS3**
Frontend & UI	**Responsive Design • Modern UI/UX Theming • CSS Animations & Transitions • Figma (Basics) • Cross-browser Compatibility**
Tools & Platforms	**Git / GitHub • VS Code • XAMPP / Apache (LAMP Stack) • Cloud Hosting & Deployment • Cloudinary / Media CDNs • AI-Assisted Development Tools**
Systems Built	**Inventory Management • Sales & Invoicing • Supplier & Customer CRM • Stock Alerts • Role-based Auth**

KEY PROJECT

InvenTrack — Smart Inventory Management System
PHP • MySQL • JavaScript • Cloudinary • CSS3 | Live: [https://rbsinventrack.great-site.net/login.php]

- Architected a 12-page full-stack web application covering inventory, sales, suppliers, customers, stock alerts, and reporting.
- Implemented session-based authentication with role-based access control (Admin / Staff).
- Built a dynamic sales module with auto-generated invoice numbers, walk-in customer support, and invoice generation.
- Designed a dark neon UI theme with Cloudinary-hosted looping hero videos across all pages.
- Created reusable PHP includes (header, footer, config) for consistent layout and DRY architecture.
- Integrated a real-time low-stock alert system with live sidebar badge counts.
- Delivered complete CRUD functionality for products, categories, suppliers, customers, and user management.
- Deployed live on a public server, accessible end-to-end from login to reporting.

CURRENTLY LEARNING / IN PROGRESS

Actively pursuing industry-recognized certifications to expand into modern frontend, UX, and cloud.

- Responsive Web Design
- JavaScript Algorithms & Data Structures
- Front End Libraries (React)

- Meta Front-End Developer Certificate
- Google UX Design Certificate
- AWS Certified Cloud Practitioner

EDUCATION

Bachelor of Computer Applications (BCA)
Raja Balwant Singh College, Agra • [2026]
